

Minutes of the Physics Division ES&H Committee  
January 8, 2007

Attendees:

John Emes  
Noel Gorman  
Richard Kadel  
John Kadyk  
Stu Loken  
Nick Palaio  
Frank Rosado  
Jim Siegrist  
Marty White

1) Customized Physics JHQ

- Discussion of what needs to be added/removed from JHQ
- Physics DOES work with some unsealed sources – Leave on JHQ
- Use of machine or hand tools should be included – Noel to see if this can be added to “Other Hazards/Research Div”
- Crane/Forklift questions should be left on JHQ
- Respirator protection; SOME respirator use; training might be needed
- Questions re: 88” Cyclotron will be added/included
- Confined Space – Leave on JHQ
- Is a specialized question on soldering necessary?
- If you are matrixed to another division you should be taking the standard JHQ
- Supervisors need to determine which JHQ an employee must take

2) Laser Training

- No laser training is needed in PH at this time (per Ken Barat)
- Training completion is at about 85-90%
- Emails are being sent out to those who need training
- Physics division is making good progress on training completion

3) All-Hands Meeting

- End of January (to be announced)
- Will address poor housekeeping, earthquake hazards
- Noel will put slides together for the meeting

4) Underground access at Daya Bay (Offsite Experiment)

- No mining being done by LBNL
- Yucca Mountain might be a good example to follow – use same framework for training
- Can the majority of training be online?
- EH&S draft plan needs to be acquired – Hopefully a light weight program will work
- More to come on this!!!
