

Minutes of the Physics Division ES&H Committee
January 14, 2008

Attendees:

F. Rosado, M. White, J. Kadyk, R. Kadel, N. Palaio, R. DeBusk, H. Speiler

JHA (Job Hazard Analysis) Update

- JHQ covers controls that require training only
- JHA is an expanded version of JHQ that covers ALL hazards
- Some issues that would not be raised in JHQ will be raised by JHA
- JHA will also give attention to work group as well as individual employees
- Much more streamlined, easier to handle

What's Next? (Handout)

- Submit a preliminary list of Work Groups and Work Group Owners by 1/22/08
- From February thru June, JHAs for each group will be developed
- Individual JHAs will be developed from July thru September
- Goal is to have 75% of JHAs completed by September 2008
- JHA will have to be submitted (revised) each year

Work Groups

- Microsystems Lab is a PH group that is run by EG employees; This needs to be addressed
- Energy Frontier – 20 employees
- Dark Energy – 30 to 40 employees
- Good idea to group “office employees” together (Jobs that take place mostly at desk – Theory, Data Analysis)
- ATLAS & CDF
- SNAP
- SCP & SNF
- CMB/Astrophysics
- BABAR
- DAYA BAY & KAMLAND (?)
- Theoretical Physics & PDG
- ILC

Power Outage

- 50A-2156: PA system does not work
- Some emergency lights were out
- Many employees did not hear announcements
- Printed version of LBNL Directory – Is there one?
- Announcement page on web was not updated – new message was not posted
- Who can be let BACK IN during a situation like this?
- “Physics Division Essential Persons” list should be compiled
